

Serbian Library Consortium for Coordinated Acquisition

Tatjana Timotijević

tatjana.timotijevic@nb.rs

Head of Department for Scientific Information
Consortium Country Coordinator
National Library of Serbia

Basic Info

- Established in 2001.
- Members - 4 Universities and their scientific institutes and research centers (more than 100 libraries)
- 6 employees (full-time job) + 2 delegates (OA and IP/WIPO)

Main goals:

- optimized procurement of foreign scientific information
- the transition from paper to electronic editions
- improving access to electronic information
- promotion of national scientific publishing

Main activities

- Budget planning
- Fight for budget (centralized financing from Ministry of Science, they are also decision makers - which publisher to subscribe)
- Negotiation with publishers (21 publisher/vendor)
- Membership in eIFL – provide us additional discounts
- Tender procedures / finance
- Reporting
- Maintaining [KoBSON web page](#)
- Updating Journal title lists (Journal changes, urls...)
- Updating usage statistics
- Customer support (trainings, presentations, mails, comments and suggestions)
- Implemented and maintaining DoiSerbia Journals and DoiSerbia PhD repositories
- Implemented and maintaining Naši u WoS service

Naši u WoS

Članci naših autora u servisu Web of Science od 2000. godine

Potrebno je uneti prezime i ime autora, i to latinicom bez dijakritičkih znakova. Za pretraživanje samo po prezimenu neophodno je nakon početne niske uneti i znak procenta (na primer: Kostic%).

Prezime autora

nedovic v%

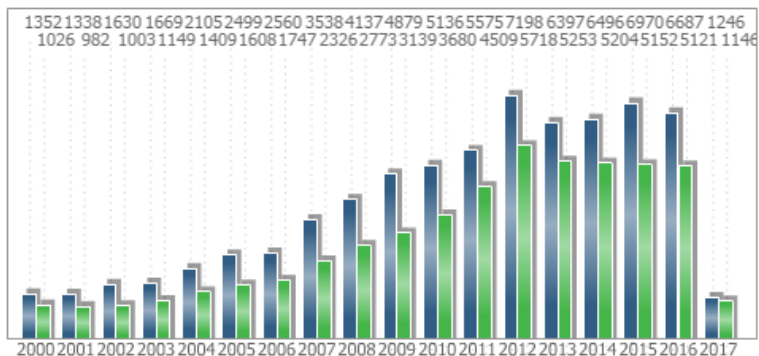

Samo Article i Review

Pretraživanje

Kriterijum za izbor radova koji pripadaju bazi formiran je tako što su iz WoS-a preuzeti svi članci u kojima su autori naveli adresu institucije u Srbiji kao svoju afilijaciju.

Zahtev za korekciju podataka u Web of Science servisu može se uputiti direktno izdavaču (Thomson Reuters) preko [forme za izmenu podataka](#).

Achievements

- New KoBSON platform - Site responsive
- EBSCO Discovery Solution –Federated Search
- International project for improvement of Serbian Scientific Publishing - *Revisiting open access journal policies and practices in Serbia* is a ten-month project (March 22 2016 – January 22, 2017) supported by eIFL and implemented by KoBSON. The purpose of the project is to investigate the policies and practices of OA journals in Serbia, to identify major problems and offer solutions to them (more than 300 journals participated)

doiSerbia repository

The screenshot shows the doiSerbia repository homepage. At the top left is the doiSerbia logo. A navigation bar includes links for Home, For researchers, Open Access, News, and About service. A main banner features a globe and the text 'Driving force behind open access' and 'Open Access'. Below this, there are sections for 'Facts' (updated 1.12.2016) with statistics on articles and journals, and 'News' with recent updates. A central alphabetical index (A-Z, ALL) is provided. Below the index is a grid of journal titles, such as 'Acta chirurgica Iugoslavica', 'Muzikologija', and 'Acta Periodica Technologica'. At the bottom left, there are logos for Crossref Member, doiSerbia PhD, and the National Library of Serbia.

Early results of the use of oblong S-ROM cementless acetabular component

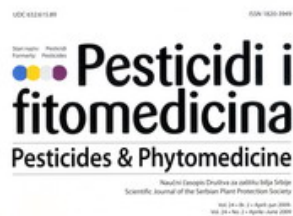

Popović Zoran, Pokimica Ljubomir, Starčević Srđan, Rajović Jovo

Massive deficiency of acetabular bone stock is a challenging problem in the increasing number of patients who need a revision of the failed hip arthroplasty. Oblong acetabular cup has been presented as an alternative reconstruction technique for hips with extensive acetabular bone loss. The aim of this study was to present our results with the use of a bilobed acetabular component inserted during revisional surgery, to define indications, and to introduce this method into our orthopaedic practice. Seven patients underwent revisional hip arthroplasty with a cementless oblong acetabular component between September 2000 and June 2002. Six patients underwent revisional hip arthroplasty, and in one primary hip arthroplasty by oblong acetabular component was performed because of bone defect of acetabulum after gunshot fracture. The average follow up was thirteen months. Radiographic analysis in all patients demonstrated stable bone incorporated acetabular component with the restored hip. All the patients walked with full weight bearing and were without pain. On the basis of our experience we find this method satisfactory in certain types of bone defects of acetabulum, and that it provides stable reconstruction of acetabulum with the correction of hip joint.

Keywords: arthroplasty, replacement, hip, acetabulum, treatment outcome

Editorial policy

Pesticidi i fitomedicina (Pesticides and Phytomedicine) is dedicated to the following research fields: chemistry, technology and analytics of pesticides; toxicology and ecotoxicology of pesticides; phytopathology; applied entomology and zoology; weed science; plant and food products protection; use of pesticides in sanitation and public health.

The journal continues the title Pesticidi, which was published over the period 1986-2003.

All articles are published in English, with summaries in English and Serbian.

The journal is issued quarterly.

Archiving digital version

In accordance with law, digital copies of all published volumes are archived in the legal deposit library of the National Library of Serbia, and concurrently in the Repository of SCIndeks - The Serbian Citation Index as the primary full text database.

Editorial responsibilities

The Editor-in-Chief is responsible for deciding which articles submitted to Pesticidi i fitomedicina (Pesticides and Phytomedicine) will be published. The decisions are based exclusively on the manuscript's merit. They must be free from any racial, gender, sexual, religious, ethnic, or political bias. When making decisions the Editor-in-Chief is also guided by the editorial policy and legal provisions relating to libel, copyright infringement and plagiarism.

The Editor-in-Chief reserves the right to decide not to publish submitted manuscripts if they do not meet relevant standards concerning the content and formal aspects. The Editorial Staff will inform the corresponding author whether the manuscript is accepted for publication within a reasonable time period after the end of a peer review procedure.

The Editor-in-Chief, as well as Section Editors, must hold no conflict of interest with regard to the articles they consider for publication. If an Editor feels that there is likely to be a perception of a conflict of interest in relation to his/her handling of a submission, the selection of reviewers and all decisions on the manuscript shall be made by another editor or a member of the Editorial Board holding no such conflict.

Problems ☹️

- Lack of employees and human resources
- Prohibition of employment more than -two year period-
- Do not have a stable team
- Contract delay
- Currency influences

Advantages 😊

- A lot of satisfied users and their huge support
- Excellent collaboration with Ministry representatives
- Excellent collaboration and understanding from publishers

Thank you for your attention.
