Achievement

Successfully accomplished EIFL OA project: DOI Serbia Thesis

The screenshot displays the doiSerbia PhD website interface. At the top, there is a navigation menu with links for Home, Thesis preparation, Thesis deposit, Arguments, About us, and Serbian. The main header features the text "RESEARCH THESIS AND DISERTATIONS IN OPEN ACCESS" alongside a blue graduation cap icon with the doiSerbia PhD logo. Below this, the thesis record for Nataša M. Tomašević-Kolarov is shown, including her contact information and the title of her PhD thesis: "Evolucija ekstremiteta velikih mrmoljačka (Triturus cristatus complex, Salamandridae, Caudata) [Limb evolution in crested newts (Triturus cristatus complex, Salamandridae, Caudata)]". The record also lists the University of Belgrade, Faculty of Biology, and the year 2013. A sidebar on the left contains the University of Belgrade logo and a list of faculties. At the bottom of the record, there are social media icons and a "Full Text" button. Two red circles highlight the "University Repository COBISS" and "List of articles in Naši u WoS" links, with red arrows pointing to the text "More Visible". Another red circle highlights the "How to cite this thesis?" link, with a red arrow pointing to "More Citable".

doiSerbia PhD

doiSerbiaPhD is national register of e-thesis deposited in the University Repositories across the Serbia. Every thesis has a DOI in order to expand its visibility. This register contains links to full texts to every single University repository.

Full Text

Faculties

- 2014
- 2013
- 2012

- Faculty of Architecture
- Faculty of Biology
- Faculty of Economy
- Faculty of Electrical Engineering
- Faculty of Security Studies
- Faculty of Organizational Sciences
- Faculty of Political Sciences
- Faculty of Veterinary Medicine

How it was done...

1. Checked for number of online repositories at Serbian Universities
2. Provided hosting for those who don't have repositories, and a joint portal where all theses will be visible
3. Built up application for assigning metadata
4. Made theses OAI compliant

Advice or Challenge

- to promote national e-thesis repositories and make them **more active**
- to make theses **more visible** and OAI-pmh compliant (DART, Europeana, OATD, DOAR)
- to make theses **more citable** and suitable for altmetrics
- Now we have **more than 1100** thesis available through our portal 😊
